

## The Present

- **2,000 jobs** created by the renewable electricity industry
- **49%** of NI electricity from renewables in 2020
- **£144m/year** operations and development spend
- **£15m/year** in rates
- **£2.4m annual** community benefits

## 80 by 30 Target

- **80 by 30** would generate over **£1bn** of new investment
- **£365m/year** operations & maintenance spend
- **2,750MW** of additional renewable capacity
- **70 %t** reduction in CO2 emissions

## Key Achievements

- **£1.5bn** invested by the renewables industry directly in NI
- **£135m** saved on consumer bills since 2000
- **9 Mt** tonnes of carbon saved in past 20 years
- **1,684MW** current renewable electricity capacity

- Enough renewable capacity to power over **700,000 homes**.
- Currently our grid can accommodate up to **70%** renewable electricity at any one time due to world leading innovations.
